Excellence in filtration

PORET®

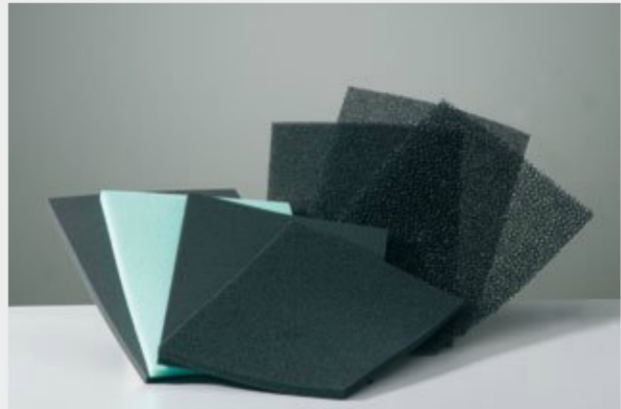

Due to our indepth knowledge and experience we are experts in the field of technical filter foams. Open-celled or closed-celled polyurethane foams are available in all common densities and in different colours.

Our foams are available in blocks, sheets, stamped parts or form parts.

PORET® filter foam (polyether)

- polyether foam
- open-celled filter foam in controlled porosities in 10 - 45 PPI (pores per inch)

PORET® filter foam (polyester)

- polyester foam
- open-celled filter foam in controlled porosities in 10 - 80 PPI (pores per inch)

Excellence in filtration

BioSafe filter mats & aquarium filters

- PORET® filter foam on polyether basis
- 10 - 45 PPI (pores per inch)
- BioSafe in T- or double-T-profile version

PORET®aqua

- patented bioactivated carrier material for use in biological wastewater treatment
- specially formulated bacteria cultures for individual application sectors
